# OUR WORK

"CON-STEEL DID AN EXCELLENT JOB EXECUTING THE LIFTS SAFETY AND WORKING WITH OUR TEAM TO ENSURE THE ENTIRE INSTALLATION WENT SMOOTHLY. THEIR EXTENSIVE KNOWLEDGE OF GIRDERS, BEARINGS AND HOISTING IS

A HUGE BENEFIT TO THE PROJECT."

*Jon Stegman, Project Manager - PCL Construction*

"WE HAVE HAD THE OPPORTUNITY TO WORK WITH CON-STEEL FROM THE START. CURTIS AND HIS TEAM ARE EXCELLENT WITH MANAGING OUR CLIENTS ON THE JOBSITE. THEY ARE PROFESSIONAL AND ALWAYS PORTRAY A POSITIVE, SOLUTION BASED ATTITUDE. THEIR EXPERIENCE WITH THE INSTALLATION OF PRECAST CONCRETE IS EXCELLENT.

I WOULD HIGHLY RECOMMEND CON-STEEL."

*Craig Halford, Vice President - Knelsen Sand & Gravel Precast Division*

## CHOOSE RELIABILITY | CHOOSE CON-STEEL

Con-Steel provides specialized construction services to general contractors as well as precast concrete/steel fabricators including project management, survey, installation, repair/removal, mobile welding/metalizing, and finishing work.

Con-Steel can take on the full scope of work or support specified services all while maintaining our dedication to safety, achieving productivity timelines, and staying within budget.

### SERVICES

**PROJECT MANAGEMENT:** Strategic planning, clear communication, detailed scheduling, comprehensive budgeting, and thorough documentation are the key elements that ensure the projects our team is taking on are managed at a high standard with a collaborative approach from conception to completion.

**SURVEY:** Con-Steel provides precise survey services ranging from complete site survey, layout of specific structural components and as-built survey of an existing structure which can then be relayed into design drawing.

**INSTALLATION:** Con-Steel efficiently and collaboratively manages the erection of a wide range of precast and steel structures including commercial buildings, parkades, bridges, stairs and handrails.

**REMOVAL & REPAIR:** Con-Steel has become a leader in the repair and removal of commercial and industrial structures, from building envelopes to structural columns and beams. Removal or repair can often be completed without interrupting regular business operations within the building.

**PATCHING, FINISHING & GROUTING:** Managing and executing projects through their lifecycle, from initial design to detailed finishing work, is Con-Steel's mission. Grouting and finishing work secures and completes a project, applying the necessary finishing touches to compliment the quality of the build.

**MOBILE WELDING:** Con-Steel's on-call mobile welders are CWB certified and ticketed in all-positions and various types of steel. We can service all project sizes from large scale to finishing work as well as on-site mobile metallizing.

**MOBILE METALIZING:** Metallizing is a specific thermal spraying process that is relevant to a variety of industries. Thermal spraying involves coating a surface with a melted metal coating for greater protection against rust and corrosion.

## OUR FIVE POINT PROMISE

**QUALITY | SAFETY | PRODUCTIVITY | INTEGRITY | PROFESSIONALISM**
